1. The radio jamming station in Prague-Zizkov is located on the hill Vitkov in Prague-Zizkov, about 300 meters from the Resistance Memorial. See Enclosure (A). Construction on this station began at the end of 1951 and the station started operations in February 1952.
2. The transmitting equipment is in a former pavilion which is located in a park. This pavilion is made of wood reinforced by bricks. The roof is the shape of a semi-globe about six meters in diameter.
3. About ten meters from the pavilion are two wooden poles about 20 meters high with an antenna on the top. These poles are fastened to the ground by steel ropes on which are porcelain insulators. The antenna is connected to the transmitting equipment by a cable.
4. Access to the building and to the poles is strictly forbidden. The building and the poles are watched day and night by the guards, soldiers equipped with rifles and attached bayonets. These soldiers wear green uniforms.
